Re: Parking Deck Revised Parking Layout
Log 1186

Gentlemen:

Enclosed for your use are one set of escolenes of three drawings dated 1-13-86, Owners Review Restripe of all three levels of the parking deck.

These drawings have been revised to show parking space widths of 8.15 feet for a one size fits all layout as recommended by BMI but we have not revised the aisle layout because it is affected by columns, lightpole bases and fire protection devices.

We are aware you only requested the upper (third) level layout to be revised but we have revised all three levels to the 8.15 foot stall width. This change permits parking an additional 48 cars per level. If all three levels are changed 144 additional cars can be parked in the deck. This would change the total deck car count from 2,412 to 2,556.

These drawings have a blank in the issue block for the Bid Package No. because we are unsure which Bid Package you intend to assign this restriping work to. We will file this work under Bid Package No. 1 until advised by your office which Bid Package this work will be assigned to and the date it is to be undertaken. We would also like to know if all parking deck levels have the space sizes revised.

We are available to answer any questions on this matter.

Sincerely,

Wm. Everett Medling, AIA
Project Manager
